

# Aerospace Case Study (Cessna Aircraft Company – Citation Mustang)

Cessna Aircraft Company ([www.cessna.com](http://www.cessna.com)) of Wichita, Kansas used NEi Nastran to perform finite element analysis on the new Citation CJ3 and Citation Mustang business jets. Customer driven enhancements like the Tension-Only Quad Element allowed Cessna to avoid redundant models and repetitive work function resulting in reduced analysis cycle time.

NEi Nastran delivered advanced finite element analysis capabilities, complete access to legacy data, and superior technical support to Cessna's line engineers, while offering a significant reduction in life-cycle cost for the Citation Mustang and CJ3.

**NEi Software, Inc.** is aggressively focused on commitment to the customer. Detailed documentation, customized on-site training, and comprehensive technical support ensures that you will see immediate return on your investment.
