

# NEi Token System

## NEi Token (Simulation Analysis)

### Overview

NEi Tokens provides the expansion of NEi Software's total simulation software package within a flexible licensing system, allowing you to use a variety of simulation tools with no restriction on time or usage. The NEi Tokens based system provides an efficient way of obtaining simulation tools from a single source without having to support a seat of software. NEi Tokens offers a way to maximize your productivity without minimizing your budget.

### The NEi Token System

The NEi Token systems allow you access to a pool of tokens. Your tokens are checked out from the pool and can be used to access and run a full range of simulation solutions, all available under the NEi Token system from NEi Software. Each individual software item requires a certain number of tokens to run. After each use, your tokens are checked back in for reuse. There are over 25 different software products available under the NEi Token System.

The pool of tokens purchased generates more flexibility towards the variety of applications one uses as well as gaining multiple usages off of one system. This allows the ability to access various applications for a single price.

NEi Software is focused on helping our customers get the most from their simulation software investment. In addition to customer driven enhancements in every release and responsive technical support, attention to software cost is fundamental to our commitment. The NEi Token System is a good example of how we can help you manage your software budget.

### Benefits

- Enhance your speed to market by taking advantage of the full breadth of the NEi Token system
- Create better teamwork within your organization through flexibility of shared products, manageability of time and efficiency through more software
- Significant savings over the cost of individual licenses needed to satisfy the same number of users
- Secure your goals through accurate analysis simulation from NEi Software
- Easy Administration

### Who can benefit from NEi Tokens

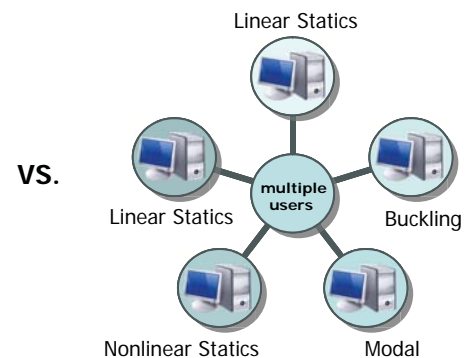

- VP of Engineering
- Engineering Managers
- Engineering Departments
- Analysts

#### Classic License

1 user

#### Token License

### Some of the Products Included

- Linear and Nonlinear Statics
- Normal Modes
- Prestress and Buckling
- Basic and Advanced Dynamics
- Linear and Nonlinear Transient Heat Transfer
- NEi Editor
- NEi Works
- NEi Fusion
- NEi Explicit
- OP2 and XDB Translators
