

FEA Software Innovator to Unveil NEi Works™ 2.1 at SolidWorks® World 2010 in Anaheim CA

WESTMINSTER, CA -- (January 25, 2010) -

Following the successful introduction of NEi Works™ in 2004, NEi Software, a global provider of Finite Element Analysis software, will unveil the next generation of the product at SolidWorks® World 2010 in Anaheim, CA. NEi Works 2.1 includes enhancements and additional features that address a segment of the SolidWorks community that requires [Nastran for Finite Element Analysis \(FEA\) solutions](#).

NEi Software CEO, David Weinberg, will be available as the company demonstrates the enhancements and new features of NEi Works including new post-processing features, usability enhancements, optimization as well as new types of analysis, elements, and loads. A full **list of enhancements can be obtained at booth #633** or during the company's **presentation** at the SolidWorks World 2010 Certified Partner Theater on **February 1st from 7:45 – 8:00 PM**.

NEi Works 2.1 is embedded in SolidWorks and has Gold Product status, a designation awarded by SolidWorks Corporation for products that pass its tests for quality and compatible integration. [NEi Works](#) is important to product developers in a wide range of industries because it relies on NEi Nastran solvers and incorporates a number of advanced simulation technologies.

Bolts and cap screw joints can be automatically created by selecting the appropriate geometry.

About NEi Software

NEi Software is a global provider of Nastran Finite Element Analysis (FEA), engineering simulation, and virtual test software. Engineers gain insight with digital prototypes, images, contour plots, graphs, and animations of linear and nonlinear structural stress, deformation, dynamics, vibration, kinematics, impact, heat transfer and fluid dynamic (CFD) simulations. The website features case studies in aerospace, automotive, maritime, petroleum, medical, and consumer products with demonstration videos, webinars, tutorials, and training schedules.
