

Press Release

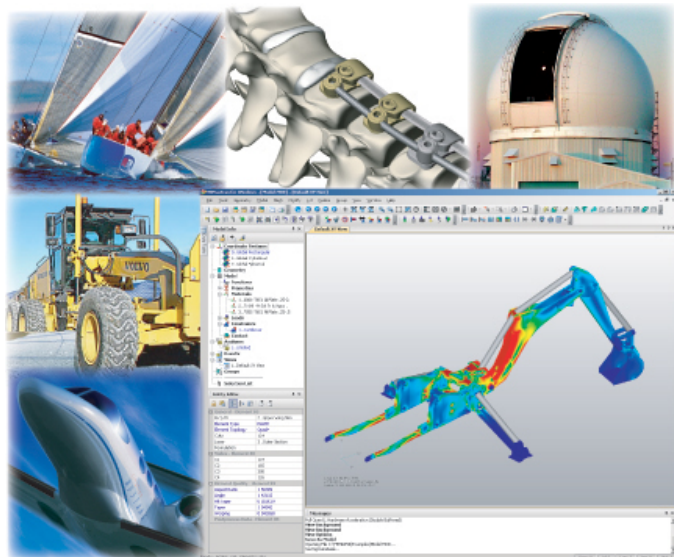

NEi Software and Strategic Simulation Analysis Ltd. SSA Partner to Deliver Nastran FEA Software in the UK

Westminster, CA. October 21, 2008. NEi Software (NEi) a leading developer and global supplier of Nastran finite element analysis (FEA) software announced that Strategic Simulation Analysis Ltd. (SSA) has signed a Distribution Agreement to sell and support its portfolio of engineering analysis and simulation software in the UK. SSA provides engineering services and software to the aerospace, electronics, bio-tech, consumer products, and heavy equipment industries.

“NEi Software provides a key segment of simulation software for our client base” offered the company’s Managing Director Laurence Marks. “We can help our customers achieve a superior competitive advantage in product development by equipping them with an industry regarded Nastran FEA technology that covers the full range of engineering analysis from designer to specialist.”

NEi’s President Philip Potasiak further explained the basis for the agreement, “SSA provides the essentials that we are

looking for in our dealer network – strong technical expertise, responsive support, and a keen understanding of the pressing business needs of companies in today’s global economy.”

NEi Nastran Finite Element Analysis (FEA) software (www.NEiNastran.com) will be distributed in the UK by Strategic Simulation Analysis Ltd (SSA) www.ssanalysis.co.uk to a variety of industries including aerospace, electronics, bio-tech, consumer products, marine, and heavy equipment. Engineering simulation software allows engineers to cut development costs, insure high quality, and optimize designs so they can be competitive in the global economy.

About Strategic Simulation Analysis Ltd. (SSA)

SSA has seven offices throughout the UK that provide engineering analysis services and consulting, and NEi Nastran finite element analysis software sales, support, and training for companies developing products and processes to achieve optimal product quality, reduced cycle time, and enhanced profitability.
