## **Noran Engineering, Inc. Announces a New Consulting Services Division**

### **Industry Leading FEA Provider Now Offers a Variety of Professional Engineering Services.**

LOS ALAMITOS, CA, March 1, 2003 — Noran Engineering, Inc. (NEi) a world-wide leader in advanced FEA software today announced the creation of it's consulting services division.

“Noran Engineering has always been a leader in the FEA marketplace and now we offer that same expertise on a consulting basis.” Said David Weinberg, CEO and President of Noran Engineering. “In today’s workplace many engineering projects are better suited to outsourcing, based on time and/or budget constraints or the lack of critical expertise in-house. Who better to help fill those voids than the FEA experts who created the software package?”

In addition to FEA development, Noran Engineering Inc. now provides a complete range of engineering services including strength analysis, product design, and CAD services. You will benefit from having a single point of contact throughout the project. We have a degreed staff comprised of Ph.D's and licensed PE's that specialize in all aspects of mechanical/structural engineering. Engineering services include:

- Technology Transfer - We can help you get up to speed in FEA Analysis by planning and implementing your project. We also teach you the key skills required by a combination of on the job training and customized seminars. This is a great way to meet urgent project deadlines and train your staff at the same time.
- Project Overload – We can take up your overload with a team of professional engineers experienced in meeting tough project challenges on time.
- Complete FEA Analysis – If you are not able to invest in FEA technology we can take care of the Analysis for you. You can be sure your project is in the hands of experienced engineers.
- Advice and Mentoring – If you are starting a complex analysis or a analysis in a field new to you and are unsure how to best tackle this project, then we can provide the advice you need.
- On Call Expert - We can even provide you with an expert on call at 15 minutes notice, for those problems that crop up at the most critical times.

**ABOUT Noran Engineering, Inc.**

Noran Engineering Inc. is a world-wide leader in CAE. Established in 1991 Noran Engineering Inc. (NEI) was created with the idea of bringing a true Nastran analysis tool from the mainframe to the desktop. Our flagship product NE/Nastran accomplished that goal. Twelve years later Noran Engineering Inc. continues to lead the competition by improving and enhancing the software's unique blend of power, ease-of-use and cost effectiveness. Noran Engineering, Inc. is aggressively focused on commitment to the customer and continuous software development. For a FREE evaluation copy, additional product information or to order NE/Nastran V8.2, call toll-free at (877) NENastran or visit us online at [www.NENastran.com](http://www.NENastran.com)
